NOTES

ABOUT

You don't need an entire box of tools to perform simple maintenance on your AR15, just one AR Multi-Tool from Firefield will do the trick! This versatile, 15-in-1 multi-tool is able to help perform gun cleaning, gun maintenance and optic/accessory mounting tasks on any AR platform firearm. The AR Multi-Tool can help with basic bolt cleaning, can adjust the windage and elevation on most optics, and is able to tighten mounts on almost all optics and accessories. Constructed of durable metal, the pliers are spring-loaded so they can be used with one hand. The tools also lock to ensure they stay in the open position while being used. The tools include pliers, wire cutters, hammer surface, bolt scraper, bit driver with 4 bits, large flat head, hex wrench, bottle opener, flat knife, metal pick and more!

- 15 tools in 1
- Can be used to adjust/mount most optics
- Can be used to fix basic issues on AR rifles
- Can perform basic cleaning of AR rifles
- Durable metal construction

TECHNICAL SPECIFICATIONS

Technical Specifications	FF35004
Length	4.2” / 107mm
Width	1” / 26mm
Height	1.8” / 46mm
Weight tool only (oz.)	12.4
Weight tool with pouch and accessories (oz.)	14.1
Material	Metal

METAL PICK

This can be used to scrape hard to reach parts of the gun like the bolt carrier.

USING THE COTTER PIN PULLER

This is used to remove the cotter pin on the bolt carrier group for bolt disassembly.

1. Insert cotter pin puller through hole in cotter pin
2. Pull out to remove pin

DIAGRAM

1. Pliers
2. Wire cutter

5. Bit driver
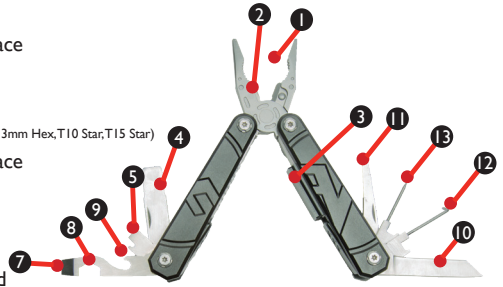
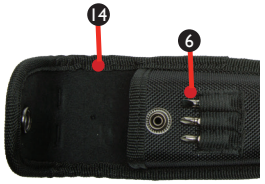
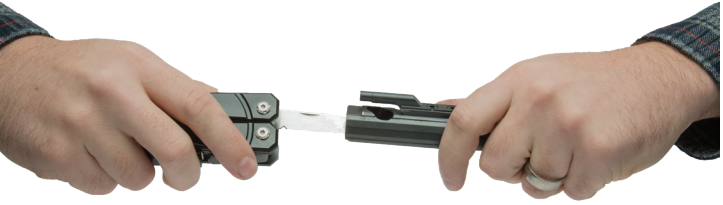
6. Bit
7. Large flat head
8. Hex wrench (For optic mount nut)
9. Bottle opener
10. Flat knife (For scraping surfaces)
11. Small flat knife (For scraping surfaces)
12. Cotter pin pull
13. Metal pick
14. Carring pouch





USING THE BOLT SCRAPER

This can be used to clean inside the bolt carrier, under the bolt.
To use it:
1.Remove the cotter pin holding the assembly together using the cotter pin puller
2.Remove the firing pin out the back
3.Remove the gas cam pin
4.Pull the bolt out of the carrier
5.Insert the bolt scraper in to the hole the bolt came out of and gently rotate to remove build up (overexertion may cause damage to the bolt carrier)
6.Assemble the bolt carrier group in the reverse order it was disassembled



FLAT KNIVES

This is used to remove build up on the bolt and other surfaces. Depending on the surface either knife can be used to remove excessive build up.
