

ARMASIGHT 6X MAGNIFIER®

USER MANUAL

INTRODUCTION

The Armasight 6x Magnifier is a high-performance afocal lens, and quickly converts your night vision monocular into a long-range night vision device. This Armasight afocal lens expands your detection and identification ranges significantly farther, making it ideal for the long-range observation and surveillance needs of military, law enforcement, and other professional users.

The Armasight 6x Magnifier is simple and quick to install in front of existing front lens of the Armasight PVS-14 Monocular, as well as most other night vision devices, for instant visual enhancement. To mount the afocal lens to the device, screw it into the threading of the standard 1X objective lens following the installation instructions provided in this manual.

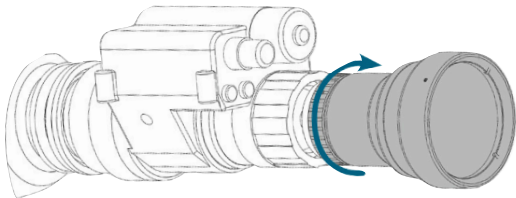

SPECIFICATIONS

Magnification	6X
Field of view angle	8°
Objective	44mm
Waterproof	IP67
Storage Temperature	- 57°C to +65°C (-70.6°F to 149°F)
Connecting thread	1.2 - 32
Dimensions (without caps)	2.85 x 2.05 in
Weight	6.5 oz

INSTALLATION AND OPERATION

Ensure that the PVS-14 objective threads and adapter threads are free from debris. Then install by rotating clockwise until snug. Be careful not to overtighten as this may cause damage to your PVS-14.

Objective focus will function normally. Note that the adapter is designed to fit most PVS-14 products that feature a standard 1.2 – 32 thread pitch with minimum depth of 1/8.”
