

# PINCADDIE 3

Leupold's PinCaddie 3 high performance engine with advanced infrared laser technology provides faster measurements with increased accuracy. PinHunter 2 technology increases the pulse rate of the rangefinder which ignores user movement to identify the pin. Our intelligent Flag Lock Technology identifies the pin from the obstacles around it, like trees and bushes, and uses the information to accurately locate and lock on to the pin.

## KEY BENEFITS

**Flag Lock identifies the pin from the obstacles around it,** like trees and bushes, and uses the information to accurately locate and lock on to the pin.

**PinHunter 2 eliminates false readings** caused by background obstacles like bushes and trees, making zeroing-in on the flag fast and easy.

**Scan Mode gives multiple quick readings in one easy sweep** with the press of a button the PinCaddie 3 continuously updates with laser-accurate ranges making it easy to plot your strategy off the tee.
