LIGHT For LIFE™

LIGHTING THE WAY IN EARLY 2009

We are always looking for ways to make your job easier. Whether that's the creation of an entirely new product - like our new Covert Dress Shirts - or the rejuvenation and revolution of an existing product on the marketplace - like our TDU replacing the old BDU, when we hear about a genuine new concept that has this potential, we listen.

Just a few months ago we were approached about a new idea that sounded entirely implausible – a rechargeable flashlight, **with no batteries**. Sounds unbelievable and that's what we thought until we met with Dr. Alexander, a scientist from Flashpoint Technology™ who explained the technology and how their power management system could revolutionize flashlights for the public safety market. Dr. Alexander and his team have been working on this technology for more than ten years in the hybrid car market and been able to bring this breakthrough **battery-free** technology down into a handheld size.

5.11 Tactical® and Flashpoint Technology™ have entered into an exclusive partnership to bring this patented technology to you, and at a reasonable price. The new 5.11 Light For Life® flashlights have a dramatically higher return-on-investment vs. other rechargeable lights and outperform competitor lights across the board.

SHOWN AT
ACTUAL SIZE

The 5.11 Light For Life™ comes with a limited lifetime warranty and its internal components are rated for a life of over 50,000 cycles. *(That adds up to more than 130 years if you use and recharge the light once a day!)* The flashlight's body is made from a state-of-the-art polymer that is impact, abrasion and water resistant to stand up to the intense duty we know you'll put it through.

Lights will be delivered on a first-come, first-served basis in early 2009. Preorder yours and learn more about the 5.11 Light For Life™ at www.511Tactical.com/lightforlife.
