# ZULU6™ HDX

BINOCULARS

16x42mm

10x30mm

SIG SAUER's innovative Optical Image Stabilization™ technology mitigates the effects of a boat's pitch and roll to provide a clear and steady image on watercraft of any size.

Featuring HDX-Glass to enhance light transmission, resolution, and definition on the water

Featuring two user-selectable modes; Scan Mode caters to broad area observation such as scanning and mapping the horizon or coastline, while Target Mode provides the ability to lock on to distant vessels, marine life, or buoys by enhancing stability by 50% for precise identification in challenging conditions.

## ZULU6™ HDX

10X30MM | 16X42MM

SOZ6WP100R | SOZ6WP160R

- ▶ Image Stabilization electronically cancels out shaking and vibration
- ▶ Featuring HDX-Glass to enhance light transmission, resolution, and definition on the water
- ▶ User selectable modes; Scan Mode & Target Mode. Target mode increases image stabilization by up to 50%
- ▶ New metal battery cap
- ▶ IPX-7
