

WeatherTech® Rotating MirrorFone

Front View

Side/Back View

Installation Instructions

Remove Rotating MirrorFone from box and rotate the head to face outward, away from the base. Turn **knob 3** until tight.

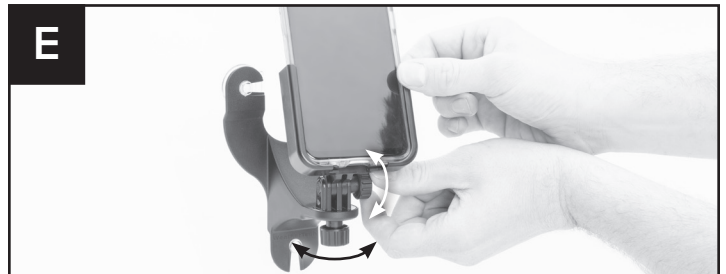

Rotating MirrorFone works best on flat, smooth surfaces like mirror or glass. Ensure the surface you are mounting it on is dry.

Adhere Rotating MirrorFone to the surface by gently pushing on each of the three suction cups, squeezing out the air, until it feels secure.

Loosen **knob 1** to accommodate the width of your phone, and then place your phone into the cradle. Tighten **knob 1**.

Adjust the tilt with **knob 2**. Adjust the rotation with **knob 3**.

To remove Rotating MirrorFone, safely store your phone before gently pulling the tabs on each of the suction cups.

To clean Rotating MirrorFone, simply wipe with a soft damp cloth and/or mild detergent.
